Information about event:

The NATO Conference on Security Policy is a conference organized by a private person called Horst Teltschik, former advisor of Helmut Kohl, former Manager of BMW and now an employee at Boeing, one of the biggest weapons manufacturers in the world.

At the annual Munich "meeting for safety policy" as it officially called, military strategists, generals and armament experts, the ministers of foreign and of defence affairs of the NATO and the EU states, as well as representatives of the armament industry and the media, meet at the hotel "Bayerischer Hof".

The conference will be held in the most expensive hotel of Munich, hosting several dozen military experts, politicians and private investors to provide a platform for relaxed (mostly private) conversation and exchange of ideas.

Also, this year, "Defense" Ministers of all member countries will be holding a meeting on the 6th.

For the past years people have been protesting the conference as an event used to promote war and military armament. And also a place for investors seeking bigger market shares abroad with the help of the military and its industry.

2 years ago all protests were prohibited by the city government of Munich, all public dissent illegalized. But still almost 10,000 people showed up to protest anyway, almost 1000 were arrested - illegally.

Because NATO allows the event to carry its name, and because NATO members are taking part, and since the conference is ironically named to be a "peace conference", it is necessary to show how NATO supports only one kind of peace, that of expansion, subduing other countries and bombing them.

The conference's own website is here:
